INDEPENDENT AUDITORS' REPORT

Retirement Plan Committee Howard County Police and Fire Employees' Retirement Plan Howard County, Maryland

Report on the Financial Statements

We have audited the accompanying financial statements of Howard County Police and Fire Employees' Retirement Plan (the Plan) as of and for the years ended June 30, 2018 and 2017, and the related notes to the financial statements, which collectively comprise the Plan's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Plan's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Plan as of June 30, 2018 and 2017, and the changes in financial position for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis (MD&A) on pages 3-5, Schedules of Changes in the County's Net pension Liability and Related Ratios, the Schedules of County Contributions, and the Schedule of Investment Returns on pages 21 through 23 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audits of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated November 21, 2018 on our consideration of the Plan's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the result of that testing, and not to provide an opinion on the effectiveness of the Plan's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Plan's internal control over financial reporting and compliance.

HOWARD COUNTY POLICE AND FIRE EMPLOYEES' RETIREMENT PLAN MANAGEMENT'S DISCUSSION AND ANALYSIS JUNE 30, 2018 AND 2017

<u>Introduction</u>

The Howard County Police and Fire Employees' Plan (the Plan) is a single-employer defined benefit public employee retirement plan administered by Howard County, Maryland, which provides retirement benefits as well as death and disability benefits and cost-of-living adjustments.

Responsibilities for administration and operation of the Police and Fire Plan vest in a Retirement Committee with seven members (Committee). The Committee has authority to establish and amend the respective benefit and contribution provisions.

Financial Highlights

The financial statements of the Police and Fire Plan were prepared using the accrual basis of accounting. Benefits and refunds are recognized when due and payable in accordance with the terms of the plan. Employee and employer contributions are recognized as revenues in the period in which employee services are performed and expenses are recorded when the corresponding liabilities are incurred, regardless of when payment is made. Investments are reported at fair value.

In 2018, the net position increased \$55.6 million or 10.8% to \$571.9 million driven primarily by investment gains of \$33.9 million. Contributions of \$34.2 million outpaced benefit payments of \$24.8 million by \$9.4 million. The number of benefit recipients increased to 399, a 9.0% increase over the prior year.

In 2017, the net position increased \$67.3 million or 15.0% to \$516.3 million driven primarily by investment gains of \$46.3 million. Contributions of \$32.1 million outpaced benefit payments of \$20.4 million by \$11.7 million. The number of benefit recipients increased to 366, a 4.6% increase over the prior year.

Overview of the Basic Financial Statements

In this financial report, the basic financial statements consist of the Statement of Fiduciary Net Position and the Statement of Changes in Fiduciary Net Position with accompanying notes as of and for the year ended June 30, 2018 with comparative information as of and for the year ended June 30, 2017. The financial position is comprised of assets, which primarily consist of investments less liabilities, including accounts payable and investment commitments payable.

Investments consist of US equities (large cap and non-large cap), international equities (international developed markets and international emerging markets), fixed income, real assets, money market and alternatives (private equities and hedge funds). The Plan is a participant in a combined pension investment pool and it does not own an undivided interest in specific assets of the Pool. The investments presented by category are the Plan's proportionate share of the investments by category of the Pool that are reported at fair value.

The Statement of Changes in Fiduciary Net Position presents the additions to and deductions from the Plan's net position during the year. The Plan receives contributions from participants and the County, as well as income or losses from investments and related activities. The primary deductions are the payment of benefits, which are the Plan's primary objectives. Deductions also include refunds to members who leave the Plan as well as administrative expenses.

HOWARD COUNTY POLICE AND FIRE EMPLOYEES' RETIREMENT PLAN MANAGEMENT'S DISCUSSION AND ANALYSIS JUNE 30, 2018 AND 2017

Notes to the Basic Financial Statements

The Notes to Financial Statements contain disclosures and discussions which support the data presented in the financial statements. The notes present information about administration of the Plan, significant accounting policies, and investments. The notes are an integral part of the financial statements and should be considered in conjunction with any review of the financial statements.

Required Supplementary Information

The RSI section provides actuarially determined information about the Plan and displays changes for the Plan's Net Pension Liability (NPL) and related ratios, contributions related to payrolls by the Plan, and money-weighted investment returns.

Summary of Financial Information

The following Condensed Statements of Fiduciary Net Position and Changes in Fiduciary Net Position present financial information for the Plan and compares fiscal years 2018, 2017, and 2016.

HOWARD COUNTY POLICE AND FIRE EMPLOYEES' RETIREMENT PLAN MANAGEMENT'S DISCUSSION AND ANALYSIS JUNE 30, 2018 AND 2017

The investment Pool's time weighted returns (gross of fees) are displayed by investment type in the following table.

Asset Class	2018	2017	2016
Equities	13.1 %	21.6 %	(4.1)%
Fixed Income	0.1 %	3.7 %	6.9 %
Alternative Investments	11.6 %	9.6 %	5.1 %
Real Assets	20.8 %	6.9 %	12.5 %

The Plan's funding objective is to meet long-term benefit obligations through contributions and investment income. The funding ratio, which is the actuarial value of assets divided by the actuarial accrued liability is an estimate of how well the Plan is meeting that objective. A higher ratio indicates the Plan is better funded. As of July 1, 2017 and July 1, 2016, the funded ratios for the Plan were 82.6% and 81.6% respectively. Additionally, Plan fiduciary net position as a percentage of the total pension liability as of June 30, 2018 and 2017 is 82.35% and 80.95%, respectively.

The Plan paid \$24.8 million in retirement benefits and refunds to participants and beneficiaries during 2018, compared to \$20.4 million in 2017 and \$17.9 million in 2016.

The Plan received \$34.2 million in contributions during 2018 and \$32.1 million in 2017 and \$28.7 million in 2016. The County contributed 100.0% of the 2018 Actuarially Determined Contribution of 32.5%. In 2017 and 2016, the County contributed the required ADC of 30.6% and 30.0%, respectively.

Additional Information

The Plan's financial statements are presented in accordance with accounting principles generally accepted in the United States of America and are available at Howard County's web page at www.howardcountymd.gov/Departments/Finance/Financial-Information/Audit-Information.

NOTE 1 PLAN DESCRIPTION

Plan Administration

The Howard County Police and Fire Employees' Retirement Plan (the Plan) is a single-employer defined benefit public employee retirement system established and administered by Howard County (the County), Maryland, to provide defined pension benefits for career firefighters and sworn police officers. The Plan is considered part of the County's financial reporting entity and is included in the County's financial statements as a pension trust fund. The accompanying financial statements present only the operations of the Plan and are not intended to present the financial position and results of operations of the County.

Plan Membership

At July 1, 2017 and 2016, the Plan's membership consisted of the following:

	2017	2016
Active	904	872
Retired and Beneficiaries	341	320
Disabled	33	33
Terminated Vested	18_	19_
Total	1,296	1,244

The Plan was established, is operated, and may be amended under the provisions of Sections 1.400 and 1.401A to 1.478A of the Howard County Code. All of the County's full-time career firefighters and sworn police officers are eligible to participate in the Plan. The Retirement Plan Committee established by Howard County Code Section 1.455A has full power and authority to administer and operate the Plan in accordance with its terms and in particular the authority contained in subsection 1.454A. The Pension Oversight Commission established by Howard County Code, Section 1.482 provides ongoing assessment and evaluation of the Plan's operations.

Benefits Provided

All of the County's full-time career police and fire officers hired on or after July 1, 1990 must enroll in the Police and Fire Plan. The Plan provides retirement benefits as well as death and disability benefits and cost-of-living adjustments.

Participants become vested after 5 years of eligibility service and are entitled to a benefit beginning at age 62. Terminated vested employees with less than 20 years of service will receive a benefit equal to 2.5% of average compensation times the number of years of creditable service, payable at age 62. If an employee leaves employment or dies before 5 years of eligibility service, accumulated employee contributions plus interest are refunded to the employee or the designated beneficiary. A participant who becomes totally and permanently disabled may retire prior to normal retirement and receive a benefit. Both disability and death benefits vary if incurred in the line of duty.

NOTE 1 PLAN DESCRIPTION (CONTINUED)

Benefits Provided (Continued)

Employees who attain the age of 62 with at least 5 years of eligibility service and employees who have completed 20 years of eligibility service, if at least 10 years were served as a covered employee, are entitled to a normal retirement benefit. The amount will vary, based on the number of years of creditable service, from 50% (with 20 years of service) to 80% (with 30 years of service) of average compensation for police; and from 50% (with 20 years of service) to 70% (with 30 years of service) of average compensation for firefighters.

Benefits in pay status are adjusted annually for a post retirement cost of living adjustment (COLA). The Plan uses the Consumer Price Index (CPI-U) for the Baltimore-Columbia-Towson area as published by the Bureau of Labor Statistics to calculate the change in retiree allowances each July. Maximum annual COLA is 2%.

Contributions

The Plan is authorized to establish or amend the obligations to make contributions under the provisions of the Howard County Code, Sections 1.423A and 1.465A. The Plan's funding policy provides for periodic employer contributions at actuarially determined rates that, expressed as percentages of annual covered payroll, are sufficient to accumulate adequate assets to pay benefits when due. Participant contributions are 11.6% of base pay for participating Police Department Employees and 7.7% of base pay for participating Fire and Rescue Department Employees. The County funds the remainder of the cost of employees' participation in the Plan, which was 32.5% and 30.6% of covered payroll in fiscal years 2018 and 2017, respectively. The County contribution to the Plan is determined through an actuarial valuation performed by Bolton Partners, Inc. for each fiscal year. Expenses incurred in the administration and operation of the Plan are funded by the Plan.

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND PLAN ASSET MATTERS

Method Used to Value Investments

The Plan's investments are maintained in a combined investment pool. The Plan does not own an undivided interest in specific assets of the Pool. The investments presented by category are the Plan's proportionate share of the investments by category of the Pool and are reported at fair value. Short-term investments consisting of money market funds are reported at amortized cost, which approximates fair value. Securities traded on a national or international exchange are valued at either the last reported sales price, evaluated bid, broker quoted, or pool-specific pricing. The fair value of real estate investments is approximated by the net asset value of the Plan's share of ownership of the co-mingled real estate investment funds. Fair value of other securities is determined by the mean of the most recent bid and asked prices as obtained from dealers that make markets in such securities.

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND PLAN ASSET MATTERS (CONTINUED)

Method Used to Value Investments (Continued)

The Plan invests in assets measured at NAV and include private equity, equity hedge, real assets and international equity funds, which are collectively considered alternative investments. Alternative investments include interests in limited partnerships and limited liability companies invested in venture capital, private equities, and other investments. These investments are recorded based on net asset value amounts established by the respective fund managers as a practical approximation of fair value. Because alternative investments are not readily marketable, the estimated value is subject to uncertainty and, therefore, may differ materially from the amount reported.

Basis of Accounting

The Plan's financial statements are prepared using the accrual basis of accounting. Employer and employee contributions are recognized as revenue in the period in which employee services are performed and expenses and refunds are recorded when the corresponding liabilities are incurred, regardless of when payment is made. Benefits are recorded when the payments are made.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates that affect the reported amounts in the financial statements and accompanying notes. Actual results could differ from those estimates.

Income Taxes

The Internal Revenue Service issued a determination letter on September 28, 2016, which stated that the Plan and its underlying trust qualify under the applicable provisions of the Internal Revenue Code and therefore are exempt from Federal income taxes.

Reclassification

Certain amounts in the 2017 financial statements have been reclassified to conform to the 2018 presentation. These reclassifications had no effect on net position, or the changes thereto.

NOTE 3 INVESTMENTS

Investment Policy

The Plan's policy in regard to the allocation of invested assets is established and administered by the Retirement Plan Committee. Specific investment goals stated in the policy are reviewed at least annually and, when appropriate, new goals and standards are adopted by the Retirement Plan Committee. The policy is expected to provide diversification of assets in an effort to maximize investment return to the Plan consistent with prudent market and economic risk. All of the Plan's assets are to remain invested at all times in the asset classes as designated by the policy. The following strategic asset allocation policy was adopted by the Plan on March 21, 2002, last amended on February 26, 2015, and remained in effect as of June 30, 2018:

	Target
Asset Class	Allocation
Equities	40.0 %
Fixed Income	30.0
Alternative Investments	22.5
Real Assets	7.5
Total	100.0 %

Concentrations

The Plan held investments in the following organizations that represent 5% or more of the pension plan's fiduciary net position: Baillie Gifford (7%), Blackstone (6%), Dimensional (6%), Dodge and Cox (11%), Invesco (6%), LSV (6%), Magnitude (6%), Mondrian (6%), PIMCO (11%), and Westfield (7%).

Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of fiduciary net position.

NOTE 3 INVESTMENTS (CONTINUED)

Risks and Uncertainties (Continued)

Interest Rate Risk

The Plan's investment policy does not place any limits on the professional investment managers with respect to the duration of investments for the Plan. The Plan's fixed income investments by maturity and type at June 30, 2018 were as follows:

	Fair Value/	Weighted Average Maturity
Investment Type	NAV	(in Years)
Corporate Bonds	\$ 24,410,329	12.05

CCC	978,244	
Not Rated	107,492,363	
Total	<u>\$ 148,628,783</u>	

Concentration of Credit Risk

The Plan's investment policy does not establish any limitation on the percentage that the Plan may have with any one issuer, other than to state that the Plan's assets are to be diversified in accordance with Modern Portfolio Theory. At June 30, 2018, the Plan's investments did not exceed 5% with any one issuer.

Custodial Credit Risk

State Street Bank invests in Government Short-Term Investment Fund (GSTIF), which is included in money markets on the Statement of Fiduciary Net Position, on behalf of the Plans. At fiscal year-end, the amount in this fund at amortized cost which approximates fair value was \$7,538,730, which was partially used for settlement of open purchases of \$213,216. All other investments of the fund are held by State Street Bank as trustee in the Plan's name.

NOTE 3 INVESTMENTS (CONTINUED)

Risks and Uncertainties (Continued)

Credit Risk - Currency Forward Contract

One of the Plan's investment objectives is to diversify assets in accordance with the Modern Portfolio Theory (MPT) in order to reduce overall risk. Consistent with this objective, the Plan has participated in a mutual fund that holds three-month currency forward contracts. This strategy is undertaken to protect the dollar value of underlying international investments. The hedging is restricted to 100% of the underlying asset value and 50% of the total Fund value. At fiscal year-end, there were no hedges in place.

Foreign Currency Risk

The Plan's exposure to foreign currency risk derives from its investments in foreign currency or instruments denominated in foreign currency. Investments in such securities are limited to a maximum net currency exposure of 40.0% at any given time. The Plan was exposed to foreign currency risk through the Pool's investments in Euro denominated alternative investments. The Pool total of these investments was \$19,054,279 and \$18,156,822 at June 30, 2018 and June 30, 2017, respectively. The Plan's proportionate share was \$10,683,041 and \$10,126,389 at June 30, 2018 and June 30, 2017, respectively.

Rate of Return

For the fiscal year ended June 30, 2018, the annual money-weighted rate of return on pension plan investments, net of pension plan investment expense, was 8.55%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amount actually invested.

Investments Purchased and Due from Sales of Investments

Investment transactions are recorded on a trade plus three days or less timetable resulting in an amount due to and due from State Street Bank (the "Plan's Trustee") at year-end.

NOTE 4 FAIR VALUE MEASUREMENT

The Plan investments are reported at fair value. The Plan categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles, as follows:

- Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.
- Level 2 Inputs to the valuation methodology include: quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; inputs that are derived principally from or corroborated by observable market data by correlation of other means. If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.
- Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

NOTE 4 FAIR VALUE MEASUREMENT (CONTINUED)

The assets or liabilities fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs. The table below reflects the Plan's proportionate share of the pool's investments by type and fair value hierarchy established by accounting principles generally accepted in the United States of America as of June 30:

			Fair Value Measurement Using

NOTE 4 FAIR VALUE MEASUREMENT (CONTINUED)

Debt and equity securities classified in Level 1 of the fair value hierarchy are valued using prices quoted in active markets for those securities. Debt securities classified in Level 2 of the fair value hierarchy refers to securities not traded on an active market but for which observable market inputs are readily available. Fixed income securities are priced on a daily basis, market to market, using a variety of third-party pricing sources, market data and methodologies.

The valuation method for investments measured at the net asset value (NAV) per share (or its equivalent) is presented on the following table:

				Redemption	
				Frequency (if	Redemption
	Fair		Unfunded	Currently	Notice
	Value	Commitments		Eligible)	Period
Private Equity	\$ 71,305,911	\$	25,620,963	Illiquid	N/A
Hedge Fund 1	32,568,103		-	Quarterly	65 days
Hedge Fund 2	33,098,607		-	Semi Annually	95 days
Real Assets Funds	19,760,764		11,903,801	Illiquid	N/A
International Equity Funds	 33,525,187		-	Monthly	15 days
Total	\$ 190,258,572				

- 1. Private Equity Funds: This represents investments that are entirely through Fund of Fund (FOF) vehicles and invest in both debt and equity strategies. Exposures are diversified by manager, region, strategy, and vintage year. Managers retained pursue distressed debt, venture, or buyout strategies. This type also includes investment in the private equity secondary market. The FOF investments have 10-40 underlying managers/funds building broad exposures for diversified performance. These funds have liquidity restrictions for the life of the investment, 7-10 years. Options for exit are limited to sale on the secondary market. Capital commitments are made to these types of investments and funds are invested through a call down structure.
- 2. Equity Hedge Funds: This represents investments in two Hedge FOF managers. Each FOF manager invests in underlying hedge funds to provide a broadly diversified portfolio. One invests with 90-100 underlying managers/funds to execute its global market strategy. The other invests in 20-40 underlying managers/funds in a relative value mandate. The hedge fund strategy is designed to diversify by manager/fund to reduce single manager/fund risk while offering portfolio diversification and provide a return profile that is uncorrelated to the rest of the assets in the portfolio. The fair values of the investments are determined using the NAV per share (or its equivalent) of the investments. These funds have liquidity restrictions of 3 to 6 months.

NOTE 4 FAIR VALUE MEASUREMENT (CONTINUED)

- 3. Real Asset Funds: This represents funds that invest in institutional real estate (office, multi-family, industrial, and retail) and natural resources strategies. The fair values of the investments in these strategies are determined using the NAV per share (or its equivalent) of the Plan's ownership interest in partnership's capital. The real estate strategies deployed include a U.S. focused property strategy (core to core plus) and a global FOF strategy. The global FOF manager invests in 20-30 underlying managers/funds. The natural resources investments are through FOF strategies. The natural resource managers invest in 10-25 underlying relationships as they build a diversified portfolio with exposure to oil, natural gas, agriculture, timber, and other natural resources. Capital commitments are made to these types of investments and funds are invested through a call down structure. These funds have liquidity restrictions for the life of the investment, 7-10 years. Options for exit are limited to sale on the secondary market.
- 4. <u>International Equity Funds</u>: This represents investments primarily in value oriented equity securities of international developed markets (non-U.S. issuers; e.g., MSCI EAFE) with the objective of achieving a long-term return above a passive benchmark (EAFE). This manager focuses on a dividend discount model value based philosophy for publicly traded equity. All securities are recorded at fair value. Foreign securities are valued on the basis of quotations from the primary market in which they are traded and translated at each valuation date from the local currency into U.S. dollars using current exchange rates. The Fund may enter into forward foreign currency exchange contracts primarily to hedge against foreign currency exchange rate risks on its non-U.S. dollar-denominated investment securities.

NOTE 5 DEFERRED RETIREMENT OPTION PROGRAM

The Plan offers a program called Deferred Retirement Option Plan (DROP). This is a voluntary benefit program which offers qualified active Participants, who would be entitled to retire and receive benefits, the option to continue working. An individual DROP record is created and is credited with the monthly retirement benefits that would have been paid during the DROP period had the participant actually retired. The record is also credited with the required employee contributions and interest. The DROP record is paid to the employee, in addition to the benefit payment entitled under the defined benefit plan based on the earlier years of service, when the employee eventually retires. Participating members may elect distribution as one lump sum payment, a rollover or in monthly payments. The balance held by the Plan as of June 30, 2018 and 2017 was \$17,149,709 and \$15,197,265, respectively.

NOTE 6 NET PENSION LIABILITY OF THE COUNTY

The components of the net pension liability of the County at June 30 were as follows:

	2018	2017
Total Pension Liability	\$ 694,495,761	\$ 637,712,072
Plan Fiduciary Net Position	(571,902,036)	(516,255,787)
County's Net Pension Liability	\$ 122,593,725	\$ 121,456,285
Plan Fiduciary Net Position as a Percentage of the Total Pension Liability	82.35%	80.95%

Actuarial Assumptions

The total pension liability in the July 1, 2017 actuarial valuation rolled forward to June 30, 2018 was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation 2.75%

Salary Increases Varies by service, 4.25% to 7.55%,

including inflation

Investment Rate of Return 7.50%, net of pension plan investment expense,

including inflation

Mortality RP-2000 Combined Healthy tables with

generational projection by Scale AA

The actuarial assumptions used in this valuation, for GASB 67 purposes, were generally based on the 2014 Experience Study covering the period from July 1, 2009 through June 30, 2013. Economic assumptions and the demographic assumptions were updated to reflect the 2009-2013 experience study.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimate of arithmetic real rates of return for each major asset class are reviewed every four years.

NOTE 6 NET PENSION LIABILITY OF THE COUNTY (CONTINUED)

Best estimates of geometric real rates of return for each major asset class, included in the Plan's target allocation as of June 30, 2018 (see Note 3), are summarized in the following table:

	Long-Term
	Expected Real
Asset Class	Rate of Return
Equities	5.37%
Fixed Income	3.50%
Alternative Investments	6.05%
Real Assets	5.45%

Discount Rate

The discount rate used to measure the total pension liability was 7.50%. The projection of cash flows used to determine the discount rate assumed that employee contributions will be made at the current contribution rate and that the County contributions will be made at rates equal to the difference between total actuarially determined contribution rates and the employee rate. Based on those assumptions, the Plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the Net Pension Liability to Changes in the Discount Rate

The following presents the net pension liability of the County, calculated using the discount rate of 7.50%, as well as what the County's net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower (6.50%) or 1 percentage point higher (8.50%) than the current rate:

	1%	Current	1%
	Decrease	Discount	Increase
	(6.5%)	Rate (7.5%)	(8.5%)
County's Net Pension Liability	\$ 221,639,954	\$ 122,593,725	\$ 41,463,640

Notes to Schedule

Valuation date:

The actuarial valuation date is the beginning of the fiscal year. Methods and assumptions used to determine contribution rates:

Actuarial cost method Projected Unit Credit (Entry Age used for GASB 67 purposes)

Amortization method Level percent of pay increasing 2.75% per year

Remaining amortization period Remaining Amortization periods range from 5 to 16 years.

Asset valuation method 5-year smoothed market

Inflation 2.75%

Salary increases Varies by service. 4.25% to 7.55%, including inflation

Investment rate of return 7.50%, before expenses, including inflation

Retirement age Rates vary by participant age and service and (for GASB purposes only)

set at 100% at DROP entry (or expected entry). Normal Cost (for GASB purposes) ceases for Police and Fire members when they enter DROP

since GASB 67 does not allow Normal Cost while in DROP.

Mortality RP-2000 Combined Healthy tables with generational projection by

Scale AA

Cost of Living Increases 2.0%
